ARICASA NEL MONDO

ARISTON, "Produttore Scope dal 1939", è un'azienda familiare la cui tradizione giunge alla terza generazione. Agli inizi la produzione era limitata a scope di saggina e fibre naturali dove l'artigiano creava prodotti di qualità che erano allo stesso tempo funzionali e duraturi. Il passare degli anni portò svariate innovazioni meccaniche e tecnologiche affiancate all'evoluzione nel sistema produttivo. Questa metamorfosi permise l'espansione di prodotti e mercati portando all'ottenimento di una gamma di oltre 150 prodotti altamente funzionali. Attualmente **ARISTON** utilizza per la propria produzione sofisticati impianti elettronici che consentono un controllo costante sulla qualità del prodotto nelle varie fasi della lavorazione. Una produzione annua di 12 milioni di pezzi, di cui il 70% sono esportati in 50 paesi, rappresenta una assoluta garanzia della nostra qualità e tradizione. Tramite investimenti prima in personale e poi in tecnologia, **ARISTON** intende ampliare ulteriormente la propria gamma di articoli nel rispetto di una consolidata qualità. Per rispondere al meglio alle esigenze di una clientela internazionale e contraddistinguere la propria produzione sul mercato, si è reso opportuno, all'inizio dell'anno 1998, introdurre il nuovo marchio "**ARICASA**". In seguito, pur mantenendo la locazione originale, il 1999 vede la costruzione di un nuovo nucleo produttivo di 7000mq, su un'area di 18000mq, ideato per far fronte alle esigenze di una clientela globa-

le sempre più
svariata. Il nuovo
stabilimento è
simbolo di tutta la
tradizione e la
qualità di
ARISTON.

ARICASA IN THE WORLD

ARISTON, "Brushmakers since 1939" is a family owned enterprise in its third generation. In the beginning manufacturing consisted of natural fibres & sorghum brooms where individual craftsmen created quality products which were both functional and hard wearing. In the course of time, this was superseded by mechanical & technical innovations paralleled by evolution in the work place. This metamorphosis ushered in unprecedented expansion of products and markets allowing the development of over 150 highly functional products. As a commitment to cutting edge technology, **ARISTON** employs sophisticated electronic systems throughout its manufacturing plant allowing constant quality control in all phases of manufacturing. This commitment has enabled production to reach 12 million units of which 70% exported to 50 countries globally, an undeniable safeguard of product quality & tradition. Through investment, firstly in people and then in cutting edge technology, **ARISTON** plans to add to its product range through ergonomic avantgarde design. In order to better service our international clientele and distinguish our products globally, we introduced a new brand name "**ARICASA**" in 1998. Whilst retaining its original location, 1999 saw the establishment of a new 7000 sqm manufacturing plant, on a total area of 18000 sqm, designed to satisfy the ever increasing world market. This new plant embodies all the tradition & quality that has become synonymous with the name **ARISTON**.

ARICASA EN EL MUNDO

ARISTON, "Productor de Escobas desde el 1939, es una empresa familiar con una tradición de tres generaciones". En sus comienzos la producción se limitaba a escobas hechas de sorgo y fibras naturales, donde el artesano creaba productos de calidad que eran al mismo tiempo funcionales y duraderos. El pasar de los años introdujo diversas innovaciones mecánicas y tecnológicas, que permitieron a su vez la evolución del sistema productivo. Estas transformaciones llevaron al aumento de productos y de mercados, y a obtener una gama de más de 150 productos altamente funcionales. Actualmente **ARISTON** utiliza para su propia producción sofisticados equipos electrónicos, los cuales permiten un control constante de la calidad del producto en las diversas fases de la elaboración. Una producción anual de 12 millones de piezas,

de las cuales el 70% son exportadas a 50 países, representa una garantía absoluta de nuestra calidad y tradición. A través de inversiones, primero en personal y luego en tecnología, **ARISTON** se plantea el objetivo de aumentar ulteriormente la propia gama de artículos, respetando siempre una calidad consolidada. Para responder adecuadamente a las exigencias de una clientela internacional y destacar su producción en los distintos mercados, fue oportuno, a principios de 1998, introducir el nuevo nombre "**ARICASA**". Después, aunque manteniendo su sede originaria, el 1999 asistió a la construcción de una nueva unidad productiva de 7000 mq, en área de 18.000 mq., destinada a satisfacer las exigencias de una clientela global y cada vez más diferenciada. La nueva sede es símbolo de la tradición y la calidad de **ARISTON**.

Uffici Offices

COMPLESSO PRODUTTIVO

Nell'ideazione del nuovo sito produttivo, **ARISTON** ha investito nello studio della logistica in modo da rendere più fluida la conduzione quotidiana della nostra attività. Questa planimetria può essere intesa come tre entità separate che lavorano congiuntamente all'unisono. Le materie prime vengono collocate in un'area apposita dello stabilimento, ma allo stesso tempo adiacente alla catena produttiva. La fabbrica dispone di tutte le risorse necessarie per essere all'avanguardia nel servire i clienti con le richieste più esigenti. Questo comporta il possesso di conoscenze tecniche su tutti i macchinari, contribuendo alla flessibilità del sistema produttivo. Il nostro magazzino è strutturato per movimentare sia grandi che piccole quantità di merce, oltre a gestire uno stock permanente di circa 1.500.000 di pezzi.

PRODUCCIÓN

En la concepción de la nueva unidad productiva, **ARISTON** ha invertido en un cuidadoso estudio de la logística, de modo tal de hacer más fácil el desarrollo cotidiano de las actividades. Este lay out se puede entender como tres entidades separadas que trabajan al unísono. Las materias primas son almacenadas en un área designada, pero a su vez adyacente a la cadena productiva. La fábrica dispone de todos los recursos necesarios para estar a la vanguardia en el servicio a los clientes que requieran las mayores exigencias. Esto comporta el conocimiento técnico de todas las maquinarias, lo que contribuye a la flexibilidad del sistema productivo. Nuestro depósito está diseñado para el movimiento tanto de grandes como de pequeñas cantidades de mercadería, además de administrar un nivel de inventarios de casi 1.500.000 ítems.

MANUFACTURING COMPLEX

ARISTON has dedicated extensive resources in developing the interactive layout of its manufacturing complex to facilitate day-to-day management. This layout is best understood as three separate entities working in unison. Raw materials are kept in a designated block attached to, but separate from, the manufacturing complex. Our production unit houses all that a modern factory necessitates to service clients with the most varied marketing requirements. This implies extensive in-house technical knowledge and know-how of all brush making machinery, contributing to efficient and speedy product turnaround. Our finished product division houses both small and volume designated areas, as well as constant inventory of 1.500.000 pcs.

Progettata & realizzata da Aricasa per soddisfare una clientela esigente alla ricerca di una maggiore distinzione sul mercato. Un design ergonomico, l'abbinamento dei colori, l'uso di materiali d'avanguardia e packaging comunicativo, sono i punti di forza di questa linea. Successivamente, l'introduzione della gamma "SureGrip" completa la nostra gamma dal pavimento al resto della casa ed oltre. Utilizzando la tecnologia in bi-iniezione di gomma si è aggiunto un tocco morbido e di facile presa a questi prodotti di uso quotidiano. L'impatto visuale a prima vista con il maggior confort durante l'uso prolungato ha trasformato la percezione e funzionalità di questi prodotti.

Designed & developed by ARICASA to satisfy discerning clientele who require an unsurpassed point of difference. Ergonomic design, perfect colour blend, the choice of the latest materials and user-friendly packaging are the strengths of this range. Subsequently, the addition of our "SureGrip" range has moved the focus from the floor to the counter top and beyond. Through over-moulding technology with rubber we added a firm, yet comfortable grip to daily use products. The visual impact coupled with increased comfort over time has transformed the perception and functionality associated with such products.

Proyectada y realizada por Aricasa para satisfacer a una clientela exigente en busca de mayor distinción en el mercado. Su diseño ergonómico, la combinación de los colores, el uso de materiales de vanguardia y packaging comunicativo, son los puntos de fuerza de esta línea. Sucesivamente, la introducción de la gama "SureGrip" completa nuestra gama del piso al resto de la casa y más allá. Utilizando la tecnología de bi-inyección de goma, se ha dado a estos productos de uso cotidiano una suave sensación al tacto, y una fácil presa. El impacto visual a primera vista, junto con un mayor confort durante su uso prolongado ha transformado la percepción y la funcionalidad de estos productos.

La prima linea di "ARICASA Home Products" dedicata agli spazi interni ed esterni della casa, con l'assortimento più ampio della sua categoria. La linea "Essentials line" è caratterizzata dai seguenti punti di forza:

GIALLO E BLU: la scelta di due colori rende omogenea ed identifica i prodotti ed il marchio "ARICASA" rendendolo riconoscibile ovunque nel mondo.

DESIGN ESCLUSIVO: un ruolo sempre più importante riveste lo studio del design dei nostri prodotti, senza trascurare la funzionalità e la praticità, che rimangono indispensabili.

RICICLO GREEN: il 90% delle nostre fibre vengono prodotte con materiale PET post-consumo.

PACKAGING: l'attenzione che poniamo alla presentazione dei nostri prodotti si è concretizzata nella cura del packaging di ogni prodotto, che oltre ad evidenziare il nostro marchio, serve a meglio indicare la destinazione d'uso del prodotto stesso.

SUPPORTI DI VENDITA: abbiamo ideato e messo a disposizione dei nostri clienti alcuni strumenti di vendita utili alla presentazione ed esposizione dei prodotti, quali pal-box, promo box ed espositori veri e propri.

The first line by "ARICASA Home Products" dedicated to indoor and outdoor home range, with the largest assortment of its category. The "Essentials line" is characterised by the following strengths:

BLUE & YELLOW: the choice of the two colours makes the "ARICASA" brand and products recognizable all over the world.

EXCLUSIVE DESIGN: our product design fills an ever-increasing role in creating new items, ensuring functionality and ease of use.

GREEN RECYCLE: 90% of our fibres are made from post-consumer PET material.

PACKAGING: attention to details in creating effective and attractive packaging of each single product is to highlight our brand and also best convey how to use the product itself.

POS TOOLS: We have created a variety of Point-of-Sale (POS) tools for our customers designed to enhance product awareness such pal-boxes, promo boxes and displays.

La primera línea de "ARICASA Home Products" dedicada a la casa (interior y exterior), con el surtido más amplio de su categoría. La línea "Essentials line" se caracteriza por las siguientes puntos fuertes:

AMARILLO Y AZUL: los dos colores elegidos dan identidad y homogeneidad a los productos y la marca "ARICASA", haciéndola reconocible en todo el mundo.

DISEÑO EXCLUSIVO: el estudio del diseño de nuestros productos cubre un papel cada vez más importante, sin dejar de lado su funcionalidad y el carácter práctico, que no dejan de ser indispensables.

RECICLAJE: casi el 100% de nuestras fibras se fabrican con material PET post-consumo.

PACKAGING: la atención que ponemos en la presentación de nuestros productos se concreta en el cuidado del packaging, que además de resaltar nuestra marca, sirve para indicar claramente el uso del producto.

SOPORTES DE VENTA: hemos creado y puesto a disposición de nuestros clientes algunos instrumentos de venta útiles para la presentación y exposición de los productos, como pal-box, box para promociones y los tradicionales expositores.

Prodotti per la pulizia della casa Home care products

Per completare la gamma dei prodotti per la pulizia, non ci siamo risparmiati nel creare la linea "**ARICASA Professional**". Dedicata alle Industrie, Imprese di Pulizie, Ho.Re.Ca e in tutti quegli ambienti dove è necessario utilizzare un attrezzo Professionale inteso come strumento di lavoro. Nel realizzare questo progetto, ci siamo concentrati sulla **robustezza e durata** del prodotto, senza trascurare l'**ergonomicità** nel design dell'attrezzo, che lo rende più funzionale e pratico nell'uso quotidiano di lavoro. Inoltre il nuovo **Attacco Universale vite + ghiera** di fissaggio del manico, rendono i prodotti della linea "**ARICASA Professional**" molto versatili, in quanto qualsiasi manico anche con vite diverse, può essere utilizzato senza difficoltà. Vi invitiamo a ordinare e provare questi prodotti e vedrete che sin dal primo uso non potrete farne più a meno.

To complete our range of cleaning products, we did our very best while creating the "**ARICASA Professional**" line. The line is dedicated to the Industry, Cleaning Contractors, Ho.Re.Ca sectors and all those environments where the use of a true Professional working tool is needed. During the development of this project, we concentrated on enhancing **sturdiness and life** of the product, without neglecting the **ergonomics** of the tool design, to make it more functional and practical during the daily use. Besides, the new **Universal Joint, screw + fixing ferrule** of the handle, makes the "**ARICASA Professional**" line products more versatile, as it can be easily used with any handle screws type. We invite you to place an order and test these products, after the first time you won't do without using them.

Para completar la gama de productos para la limpieza, no hemos escatimado recursos a la hora de crear la línea "**ARICASA Professional**". Dedicada a las Industrias, Empresas de Limpieza, Horeca, y en todos los entornos donde sea necesario utilizar un instrumento Profesional entendido como herramienta de trabajo. En la realización de este proyecto, nos hemos concentrado en la **solidez y duración** del producto, sin olvidar la **ergonomía** en el diseño del mismo, que lo hace más funcional y práctico en su uso cotidiano. Además, el nuevo **Acoplamiento Universal tornillo + virola** de fijación del mango, da una gran versatilidad a los productos de la línea "**ARICASA Professional**", ya que pueden utilizarse sin dificultad todo tipo de mangos con diferentes roscas. Les invitamos a pedir y probar estos productos, para comprobar como, a partir del primer uso, ya no podrá prescindir de ellos.

 **Gli articoli di Aricasa Professional sono più che speciali: sono ecosostenibili!** Essi, infatti, sono prodotti da materiale di scarto della nostra produzione: dalla scocca, alle fibre, fino alla ghiera di fissaggio, tutte le parti in plastica degli articoli **Aricasa Professional** sono realizzati con plastica riciclata e riciclabile. Questo ci permette non solo di **risparmiare** ma anche di **ottimizzare** l'utilizzo delle materie prime, dando un piccolo contributo all'ambiente producendo meno rifiuti e consumando meno risorse.

Aricasa Professional articles are more than special: they are eco-sustainable! In fact, they are produced from waste material of our production: from the shell, to the fibers, up to the fixing ring, all the plastic parts of **Aricasa Professional** articles are made of recycled and recyclable plastic. This allows us not only to **save** but also to **optimize** the use of raw materials, making a small contribution to the environment by producing less waste and consuming less resources.

Los artículos de Aricasa Professional son más que especiales: ¡son ecosostenibles! En efecto, son producidos a partir de material de desecho de nuestra producción: desde la carcasa, a las fibras, hasta el anillo de fijación, todas las piezas de plástico de los artículos **Aricasa Professional** son realizadas con plástico reciclado y reciclable. Esto nos permite no sólo **ahorrar**, sino también **optimizar** el uso de las materias primas, haciendo una pequeña contribución al medio ambiente, produciendo menos residuos y consumiendo menos recursos.
